Brainstorming & Idea Prioritization

Date:29 September 2026

Team ID:_____

Project Name: Script-Controlled ACL – Restrict Record Access Based on Field Value

Maximum Marks:3 Marks

Step 1: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	**Bhuvaneshwari G**	Create users with appropriate roles for secure record access.	User Management	1
2	**Guruthirisha N**	Create custom roles to control user permissions for different operations.	User Management	1
3	**Deepika T**	Create the Institution Details table and store student records with branch values.	Database	2
4	**Iswarya T**	Implement Script-Controlled ACL to restrict record access based on branch values.	Access Control	2
5	**Bhuvaneshwari G**	Control CREATE and WRITE operations for authorized users.	Access Control	3
6	**Deepika T**	Control DELETE operations and prevent unauthorized record deletion.	Access Control	3

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	Create users and custom roles for secure access management.	High	High	1	Yes
2	Create a custom table and restrict record access based on branch values using ACL.	High	High	2	Yes
3	Control READ, CREATE, WRITE, and DELETE operations using Script-Controlled ACLs.	High	High	3	Yes

Selected Project Idea

Script-Controlled ACL – Restrict Record Access Based on Field Value

The selected idea is to implement **Script-Controlled Access Control Lists (ACLs)** in ServiceNow to restrict record access based on field values and user roles.

The system controls **READ, CREATE, WRITE, and DELETE** operations and prevents unauthorized users from accessing or modifying student records.

Project Work Distribution

Based on the task assignment you gave earlier:

Milestone	Activity	Responsibility
Milestone 1	User Creation	**Bhuvaneshwari G**
Milestone 1	Role Creation	**Guruthirisha N**
Milestone 2	Table Creation	**Deepika T**
Milestone 3	READ ACL Configuration	**Iswarya T**
Milestone 4	CREATE ACL Configuration	**Bhuvaneshwari G**
Milestone 5	WRITE ACL Configuration	**Guruthirisha N**
Milestone 6	DELETE ACL Configuration	**Deepika T**
Milestone 7	Project Outcome / Conclusion	**Iswarya T**

Expected Outcome

The proposed solution aims to provide secure record-level access in ServiceNow. Users will be allowed to perform only the operations permitted by their assigned roles and configured ACL rules. Branch-based access will help prevent unauthorized users from accessing restricted student records.
